

MechTrack

AUSTRALIAN-BUILT FLEET & EQUIPMENT SOFTWARE

YOUR FLEET, FULLY MANAGED.

Vehicle & equipment management, compliance, team messaging and job dispatch — one system, and we run it for you.

- **Fleet & equipment** — every vehicle & machine in one register
- **Compliance** — insurance, NHVAS, licences, rego & pre-starts
- **Team messaging** — send a notice, get replies, one record
- **Job dispatch** — send jobs & pickups to a driver's phone
- **Fully managed** — we host, back up & support it for you

Start free — we set you up in one session.

Fleet & equipment

Every truck, trailer, forklift and machine in one register — service history, rego, inspections, costs and hours per unit.

Compliance, handled

Insurance, NHVAS, licences, rego and pre-starts tracked with automatic alerts before anything lapses.

Team messaging

Broadcast to the whole depot and get replies back — no personal numbers, no lost WhatsApp threads, one record.

Job & pickup dispatch

Assign jobs and pickups in seconds — the driver gets it on their phone, status comes back to the office. No paper run sheets.

Fully managed

Australian hosting, daily off-site backups, updates and security — all handled. Nothing to install, no IT team needed.

Why fully managed?

Most fleet software leaves the hosting, backups and updates to you.

MechTrack doesn't — we run the whole thing, so your team just logs in and works. Built and supported in Australia.
